

# Control Flow Programming

14 July 2025 16:33

## ① Procedural

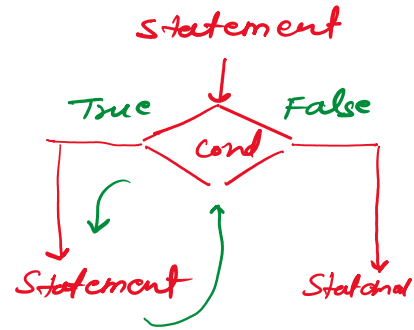

### ① Sequential

### ② Conditional

### ③ Control Flow

### ① While loop

```
name = "Uwaish"  
print(name[0])  
|  
print(name[5])
```

### ② For loop

#### 3 step process

Step 1: Initialize

Step 2: Condition

Step 3: Operation

# Display first 10 numbers.

```
print(1)  
print(2)  
print(3)  
|  
print(10)
```

num = 1    11 < 10 → False (stop)

2 <= 10

1 <= 10

while num <= 10:

print(num) → 1

num += 1 → 2

num = num + 1

1 + 1 ⇒ 2

# while loop with conditional prog.

initialize

initialize

while cond :

if cond :

=

else :

=

operation
